

Task Management Web App

Description

Welcome to the Task Management Web App! This project is designed to help users efficiently manage their tasks through a user-friendly interface. Built with PHP and MySQL and hosted on an XAMPP server, the application allows users to create, update, filter, and delete tasks easily.

Key Features

- **User Authentication:** Secure login and signup functionalities to protect user data.
- **Session Management:** Maintain user sessions for a seamless experience.
- **Task Management:**
 - **Create Tasks:** Add new tasks with the following fields:
 - **Title:** A brief title for the task.
 - **Description:** Detailed information about the task.
 - **Start Date:** When the task should begin.
 - **End Date:** The deadline for the task.
 - **Priority:** Set the importance level (e.g., High, Medium, Low).
 - **Status:** Track whether the task is Pending, In Progress, or Completed.
 - **Category:** Organize tasks into relevant categories.
 - **Update Tasks:** Modify existing tasks as needed.
 - **Delete Tasks:** Remove tasks that are no longer required.
- **Task Filtering:** Quickly find tasks based on specific criteria.
- **Excel Export:** Download your tasks in an Excel file for offline access or reporting.
- **Logout Option:** Securely log out to protect your account.
